Blinds Between the Glass (BBG)

PRODUCT BULLETIN

Blinds Between Glass (BBG) in Casement, Picture and Patio Doors

Effective immediately, Minnkota Windows™ will offer Blinds Between Glass (BBG) within a sealed glass unit for many Casements, Picture Windows and a wider variety of Sliding Patio Doors.

- Safety for Children and Pets
- Control of Privacy, light and heat from the sun
- Easy Operation
- No Dusting
- A clean, efficient look
- No need for bulky window treatments

All BBG units have a hard-coat LoE² 272, no Argon

Reliability

- Blinds go through a series of reliability tests, including 10,000 raise and lower cycles
- Over 5 million shipped
- Designed for wider IG requirements of sliding patio doors
- Advanced internal mechanisms assure reliability
- Force-to-lift ratio designed for easy operation
